

Diesel Antifreeze

Diesel Antifreeze is formulated to enhance the fuel flow in cold temperatures, helping to prevent the fuel filter clogging by precipitated paraffin. It is effective in temperatures down to -30°C .

 Improves diesel reliability and reduces downtime from cold temperatures in the fuel system failures.

 Helps to maintain the cleanliness and efficiency of the fuel system.

 Compatible with all diesel fuel system components.

*Available to Order
Sep/Oct
2011*

*Available in:
300ML Bottle
Treats up to 50 liters of fuel*
