

INTERIOR VALETING

Do you enjoy a fresh and clean fragrance inside the car? What with spending so much time in there, who doesn't!

Flash Dash

contains a winning formulation that cleans and protects interior surfaces, whilst providing a long lasting shine.

TOP TIP

Before starting interior cleaning, vacuum seats, carpets and even plastic elements.

As crazy as this sounds, rub a clean paintbrush through your hair to charge it with a mild static, in order to effectively remove dust from vents and other harder to reach dashboard areas.

If you wish to clean without shining, use **Demon Green**.

Not only cleaning dirt and grime from plastic elements, it can also be used to clean windows, windscreens and paintwork of stubborn insect and bird lime, whilst leaving a pleasant fragrance.

Use Leather Valet

to clean leather upholstery. It is an excellent cream that moisturises and nourishes the leather.

TOP TIP

For leather upholstery cleaning you can also use CarPlan's unique **Leather Valet Wipes**.

INTERIOR VALETING

*Decided to refresh and revamp car upholstery?
Then look no further!*

Use **Interior Valet** to clean dirt from upholstery. For stubborn stains, use **Stain Valet**.

Rub it in to upholstery with the attached brush applicator. Scrape away the dirty foam with the edge of the applicator and wash in warm water, then repeat this cleaning process. Finally, wipe down upholstery with a clean, damp cloth and leave to dry.

TOP TIP

Open all doors in order to provide good ventilation to help upholstery dry quicker.

TOP TIP

The cleaning of heavily soiled air conditioning units is often problematic and expensive. To avoid any difficulties, simply use **Kleen Air** once or twice a year.

*The car interior is clean
but there is still an unpleasant
smell coming
from the air
conditioning
system?*

Using **Kleen Air** means that you can refresh your air conditioning system in 10 minutes. The whole cleaning process runs effectively without the use of additional tools or removal of dashboard parts.

CarPlan

The CarPlan brand prides itself on innovation!
